It is foreseeable that the popularity of "hybrid printing" will be growing tremendously in the near future because not only can users use digital printing as digital proof and short-run, but also for additional printing for offset. However, the workflow and colour management for digital and offset printing are different. For success, it is important to integrate both workflows and colour mapping. In this session, the techniques about this integration will be discussed.</p> <p>Speaker:</p> <p>Mr Cheung Ming Yiu , G7 Expert, G7 PC Expert, One of the major instructors of APTEC G7 認可專家、G7 PC 認可專家、APTEC 主要導師之一 張銘堯先生</p>
